Proposed Rule (SEC) 151A

By now, I'm sure you have heard about Proposed Rule 151A issued by the Securities and Exchange Commission (SEC) that would essentially require registration of all fixed indexed annuities as securities. If adopted, this rule would significantly change the way in which fixed indexed annuities are marketed and the requirements imposed on producers who sell them. National Western believes that the proposed rule is unworkable and fundamentally in conflict with both SEC and judicial precedent. We are asking our producers to join us in opposing the adoption of this rule.

Although you are certainly not obligated to do so, we strongly urge you to contact your Congressperson regarding the ramifications of this proposal. We have included a link that will help you locate and contact your local Representative. This link will allow you to email directly to your Congressperson. For your convenience, attached is a sample letter that can be included in this email. Thank you for your support.
